ASE 485 Projects Based on Discussion

This is an initial discussion, we will discuss more and upload the final project topics list later.

- ASE 485 projects are individual projects based on each student's interest and discussion with the instructor.

- However, as many students request working on the same project topics, we need to make rules to manage in this case.

- The aim of the rule is to be fair to all students who work in a team or individually.

- We call the project that multiple students work together as "team-like projects" in this slides.

Rules

- Even in team-like projects, each student are evaluated individually.
  - Each student needs to submit their own project report and code.
  - The work that are done together need to be clearly indicated in the report.
- In general, team-like projects

Project Topics Discussed

Team-like Projects

- Joseph Ampfer, Philip Bierley, and Landen Tomlin
  - Hand Gesture Recognition

- Austin Shelton & Cley Shelton
  - Need more talk to define the project

- Anna Dinius & Jeffrey Perdue
  - Dietary Ristriction (Allergy Eats)

Individual Projects

- Nate Brewer

  - Audio Reconstruction Using AI

- Owen Newberry

  - Honor Scholarship Project Continuation

  - Need more talk

Not Decided Yet

- Dillon Carpenter

- David-Michael Davies

- Nabou Diouf

- Parker Groneck

- Preston Jackson

- Cody King

- Ben Molloy

- Danny Poff
